

PRESS RELEASE

iBAHN Reports Significant Growth in New Properties in Q1 2009

Financial Stability, Investment in Technology Development, and Innovative Products Build Loyalty among Its Clients

Salt Lake City (*April 28, 2009*) – iBAHN, a world leader in end-to-end digital entertainment and Internet solutions for the hospitality and meetings industries, continued its record growth in the first calendar quarter of 2009. The company signed new contracts for more than double the number of rooms contracted in the first quarter of last year for its innovative secure high speed Internet access (HSIA) and digital IPTV services. The company booked more than \$11 million in new footprint sales, and showed a 200% increase in the worldwide sales of its ground-breaking IPTV product, ETVi.

“In these challenging economic times, our hotel partners continue to seek ways to differentiate their properties, and reduce the total cost of guest-facing amenities while continuously improving quality,” notes David W. Garrison, iBAHN’s chief executive officer. “Our success is based on our ability to meet and exceed hoteliers’ expectations with the highest quality products and services available in the hospitality industry. As we have always done, iBAHN continues to invest in research and development to help our clients to maintain their competitive positions.”

The company’s first quarter sales revenues represent a mixture of new footprint sales in its HSIA solutions, sales in its proprietary meetings and conferences services, and ETVi HD, its newly launched digital information and entertainment solution. Among the company’s clients are the world’s leading hotel brands, ownership and management groups, and corporate meeting planners. The company also benefits from an outstanding contract renewal rate among its existing customers.

About iBAHN

The company is the only global provider of digital entertainment and Internet solutions for the hospitality and meeting industries. Monthly, more than 1.8 million travelers and meeting attendees rely on iBAHN to increase productivity with secure high-speed Internet access options in nearly 3,000 hotels, conference centers and meeting spaces in 30 countries worldwide. iBAHN’s digital entertainment and information services feature leading programming in Europe, Asia, Australia and India. Operating one of the largest MPLS networks in the industry, the company provides technology solutions to more than 50,000 events annually, ranging from small group meetings to major industry conferences, while serving more than a third of Fortune 100 corporations.
