### ***London Marriott Twickenham chooses iBAHN to provide High Speed Internet access***

**London** - (April 16, 2009) – iBAHN, the worldwide leader in digital entertainment and Internet solutions for the hospitality and meeting industries, today announces that it has completed a full High Speed Internet Access (HSIA) installation at the London Marriott Hotel Twickenham, incorporating both wired and wireless connectivity.

Guests to the new hotel, which is integrated within the South Stand of the Twickenham Rugby Stadium, can now enjoy wired and wireless access in the hotel's 156 guestrooms, including six pitch facing suites that overlook the international ground, as well as wireless access in the public areas.

The installation offers business travellers the highest standards of data security through iBAHN's Wi-Fi Protected Access (WPA) solution, which eliminates the ability to steal guest data and provides total separation between different wireless users.

In addition, iBAHN offers a Virtual Private Network (VPN) certification programme and unlimited IP addresses which allows business travellers to connect easily to their own corporate network.

Paul Davies, General Manager of London Marriott Hotel Twickenham, comments: "We chose iBAHN as our HSIA partner because the brand is highly regarded in the hotel industry. As a new hotel in a very prestigious location, we needed to be sure that we had a supplier who could deliver our connectivity needs in full."

Graeme Powell, Managing Director EMEA, iBAHN, adds: "London Marriott Hotel Twickenham offers superb facilities for business and leisure travellers. We have delivered the very best infrastructure that will provide fast, secure and trouble-free internet connectivity."

**Ends**

**About iBAHN**

iBAHN is the only global provider of digital entertainment and Internet solutions for the hospitality and meeting industries. Monthly, more than 1.7 million travellers and meeting attendees rely on iBAHN to increase productivity with secure high-speed Internet access options in more than 2,500 hotels, conference centres and meeting spaces in 28 countries worldwide. iBAHN's digital entertainment offering, ETVi, offers hotel guests leading digital video and entertainment services. Operating one of the largest MPLS networks in the industry, the company provides technology solutions to more than 50,000 events annually, ranging from small group meetings to major industry conferences, while serving more than a third of Fortune 100 corporations.
